**NOW PART OF THE  
INNO-PAK FAMILY OF  
SUSTAINABLE, INNOVATIVE  
PRODUCTS**

We are proud to announce the addition of Stalk Market Compostable Products and Planet+ and their cutting-edge compostable and eco-friendly packaging. This strategic move dramatically expands Inno-Pak's ability to offer sustainable products throughout the Americas and serve the evolving needs of industries in which green packaging is increasingly paramount. Inno-Pak is now uniquely situated to remain a leader in an environment that prioritizes responsiveness, responsibility, and customer relationships.

# ECO-FRIENDLY PACKAGING

## STALK MARKET MAKES IT EASY TO DO GOOD

Most Americans want the businesses they shop from to use sustainable practices. They want to know that the products they enjoy do good for the environment, but it isn't always easy to know how to meet that demand.

Recycling, for all its benefits, is tough. The end user of a product doesn't always clean the product thoroughly enough or sort them correctly. As a result, a recyclable product ends up contaminating the recycling stream. In the end, would-be recycled products wind up in landfills or in the ocean.

Stalk Market Compostable Products and Planet+ by Inno-Pak remove the guesswork of helping the environment. They're made from natural plant fibers or PLA, a plant-based material. These materials allow us to combine quality construction with sustainable sourcing for a green, durable product.

When end users finish their meals, they can put their packages into a commercial composting bin. In turn, those composters break down the organic packages and convert them into nutrient rich compost that benefits our soil, water, and atmosphere in a number of ways.

# WHY CHOOSE INNOBOX EDGE™?

## INNOBOX EDGE ADVANTAGE

Inside corner folds set the INNOBOX EDGE apart from other cartons. Why set them inside?

- ◆ Creates a streamlined edge
- ◆ Strengthens corners
- ◆ Protects against leaks

## PERF-ECTION: TEAR-AWAY FLAPS!\*

Turn the INNOBOX EDGE into a food tray in four easy tears.

- ◆ Perforated flaps tear easily
- ◆ Removing the flaps improves the customer experience

\*U.S. Patent Nos. 10,829,262 & D876,951

## THE MOST SECURE CLOSURE

The Reverse Lock Closure\* keeps the INNOBOX EDGE closed and prevents spills and messes when in transit.

\*U.S. Patent No. D777,029

## THE IMPACT OF OPTIMIZED INNOBOX EDGE CASE PACKS — SAVINGS!

- ◆ Optimized case mean smaller, lighter cases making storage and lifting easier
- ◆ Optimized case mean more product fits on every pallet and on every truck
- ◆ Optimized case packs reduce wasted space and improve efficiency

# HERE'S THE DIRT ON COMMERCIAL COMPOSTING

## GOOD FOR THE EARTH

According to the Biodegradable Products Institute, "composting is a natural process that turns organic materials into a valuable soil amendment."

Composting plays a unique and vital role in sustainability efforts. It diverts organic waste away from landfills and turns them into a product that can help the environment.

## BENEFITS OF COMPOST

- ◆ Improves soil and water quality
- ◆ Can improve crop yields
- ◆ Can replace chemical fertilizers
- ◆ Reduces methane emissions in the atmosphere
- ◆ Helps aid reforestation, wetlands restoration, and habitat revitalization
- ◆ Provides carbon sequestration.

## TYPES OF COMPOSTING

Commercial composting facilities accelerate the breakdown of organic materials, like those in our commercially compostable packaging.

The two most common types of commercial composting today are windrow and Aerated Static Pile, according to BPI. A third method uses in-vessel, positive aeration, membrane laminate technology.
